HOSE & PIPE LIFTER

Grip interface for lifting and repositioning hoses and pipes

TASK

Provide a grip interface for manually lifting and positioning hoses and pipes, keeping the hand away from the hose surface, fittings and contents.

HAND EXPOSURE ADDRESSED

Hand contact with hose and pipe surfaces during manual handling; skin contact with residual fluids; abrasion from hose texture or fittings; awkward grip posture during heavy hose handling.

CONFIGURATIONS

Configurations confirmed during application review.

SELECTION CONSIDERATIONS

Confirm hose or pipe diameter, fluid contents, isolation status and estimated handling weight before selection. Review the complete handling movement, including pick-up, travel and set-down.

APPLICATION GUIDANCE

Confirm hose or pipe diameter, contents, isolation status, handling weight and the complete movement before selecting. Review the pick-up, travel and set-down steps. Do not use on pressurised or non-isolated lines without confirming appropriate procedure.
